

SalesPad Mobile System Log Search

Megan De Freitas - 2025-06-09 - Miscellaneous

Overview

System Log Search allows users to look through the system log. Users can customize how results are drawn and what information is displayed. This document will teach you how to access System Log Search, use the search function, copy system log entries, and export a search.

System Log Search

Accessing System Log Search

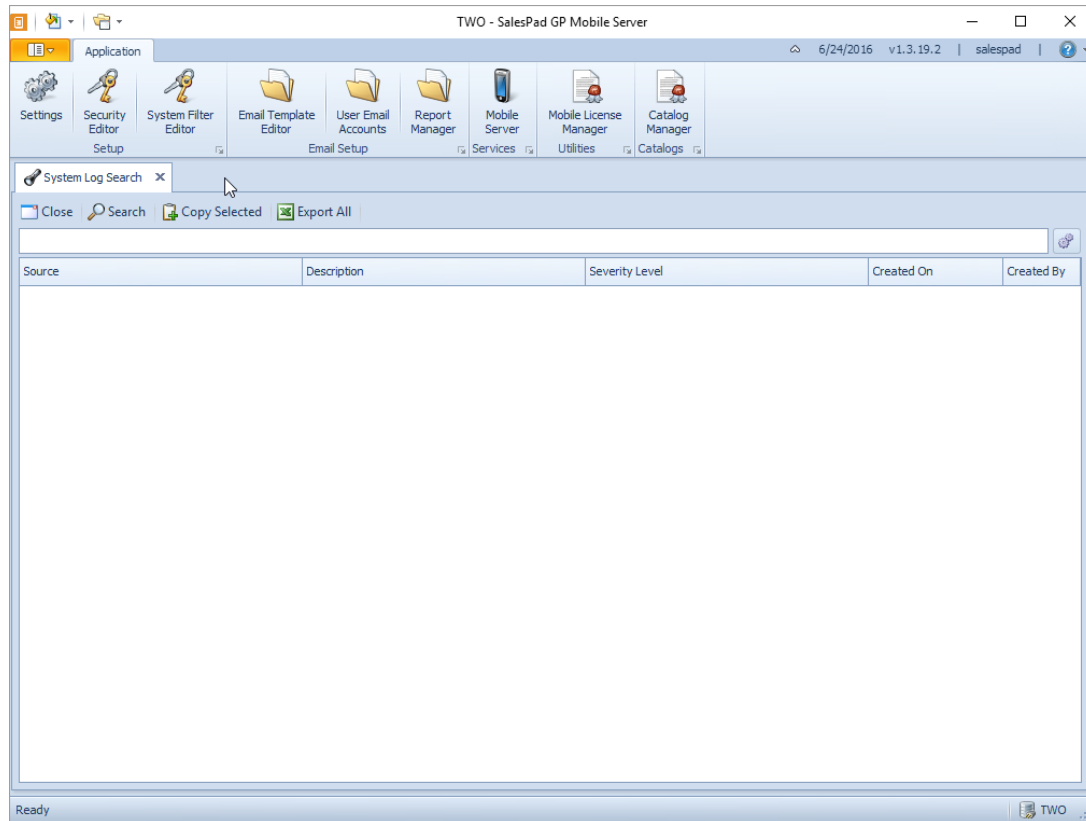

In Mobile Server, go to the folder in the bar on the top left of the screen.

Click on this folder to access a dropdown menu, then go into System, and from that menu select System Log Search.

This will open the System Log Search module.

Using the Search Bar

The search bar for System Log Search uses text input to look through system log entries for matching text. To use the search bar, click in the white space and enter your search criteria.

Once you've performed your initial search, click the gears to the right of the search bar to access the Configure Search window. Here, you can specify which fields your search affects. Click the check box next to the field(s) you want to use for your search, then click **OK** to save the changes.

Configure Search [X]

<input type="checkbox"/>	Changed By	
<input type="checkbox"/>	Changed On	Not Searchable
<input type="checkbox"/>	Created By	
<input type="checkbox"/>	Created On	Not Searchable
<input checked="" type="checkbox"/>	Description	
<input type="checkbox"/>	Dismissed	Not Searchable
<input type="checkbox"/>	Group	
<input type="checkbox"/>	Logged On	Not Searchable
<input type="checkbox"/>	Row ID	
<input type="checkbox"/>	Severity Level	Not Searchable
<input checked="" type="checkbox"/>	Source	

OK Cancel

After your desired search settings are in place, click the **Search** button to complete the action. There will be a list of system log entries that match your search.
