Setting On Load Email Script

Megan De Freitas - 2024-11-22 - [Setup](#)

Overview

The On Load Email Script setting allows you to run a script that can be used to specify which email addresses to use when emailing from a Sales Document or Purchase Order in SalesPad. When the script is run, it populates the default email addresses that you have provided in Dynamics GP under Ship To or Bill To,

Setup

Settings

Under Settings, filter to “default email” and select “Default Email Address.” This specifies which customer email address (Shipping/Billing) will be defaulted to in the "Send Email" screen for sales documents.

The screenshot shows the SalesPad Settings application window. The title bar is 'Settings'. Below the title bar are buttons for 'Close', 'Save', 'Export Settings', and 'Import Settings'. A search filter is set to 'default email'. The results are displayed in a table with two columns: the setting name and its current value.

Sending Emails	
Default Email Address	Billing
Default Purchasing Email Subject Line Format	Billing
Default Sales Document Email Subject Line Form	Shipping
Smart Printing	
Default Email Subject Line	Salespad Document Attached

Below the table, there is a section titled 'Default Email Address' with a description: 'Specifies which customer email address (Shipping/Billing) will be defaulted into the Send Email screen for Sales Documents. Defaults to 'Billing'.'

Also under Settings, filter to “On Load Email Script.” Copy the script found at the end of this document into the drop-down field.
