Setting Use Drop Ship Sales Line Item Cost

Cavallo Support - 2024-11-22 - Purchasing

You can set up SalesPad to populate the cost when creating a new Purchase Order for dropship items, with the *Use Drop Ship Sales Line Item Cost* setting. With this setting enabled, it won't be necessary to key in the cost on the order and then re-enter the cost on the PO — the cost entered for the drop ship item on the order will also be applied to the Purchase Order created for it.

To enable this setting, go to Modules > Settings and filter to Purchasing. Set *Use Drop Ship Sales Line Item Cost* to True:
