

## Shipping Review

Megan De Freitas - 2024-11-22 - Sales

### Overview

The Shipping Review module provides a convenient place for users to view and modify sales document lines and forward documents to the next workflow queue for shipping. This is the only place in SalesPad that you can set a document's actual ship date, after processing the document.

### Usage

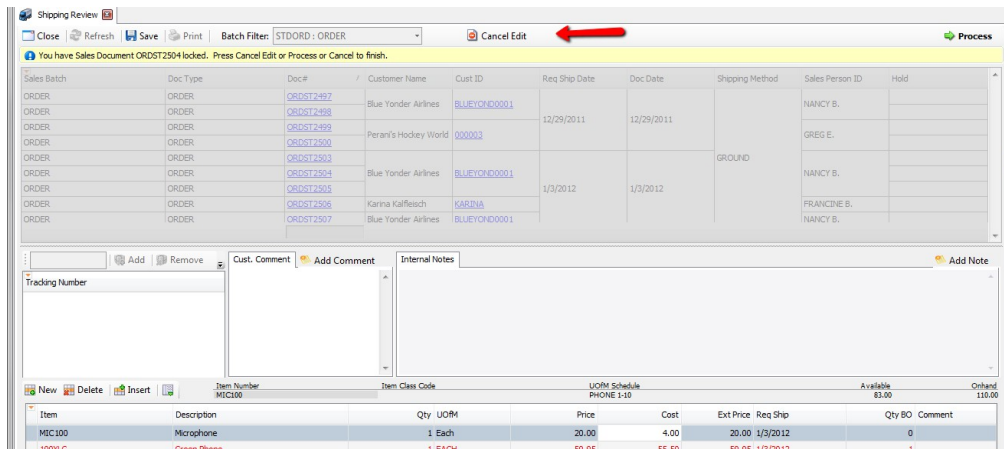

1. To open Shipping Review, go to Modules > Sales > Shipping Review

The screenshot shows the Shipping Review interface. At the top, there is a toolbar with 'Close', 'Refresh', 'Save', and 'Print' buttons. A 'Batch Filter' dropdown is set to 'STDORD : ORDER'. Below this is a table of sales documents with columns: Sales Batch, Doc Type, Doc #, Customer Name, Cust ID, Req Ship Date, Doc Date, and Shipping Method. The table contains several rows of data. Below the table is a section for 'Cust. Comment' and 'Internal Notes'. At the bottom, there is a detailed view of a selected document with columns: Item, Description, Qty, UOM, Price, and Cost. The detailed view shows items like '100NLG Green Phone' and 'A100 Audio System'.

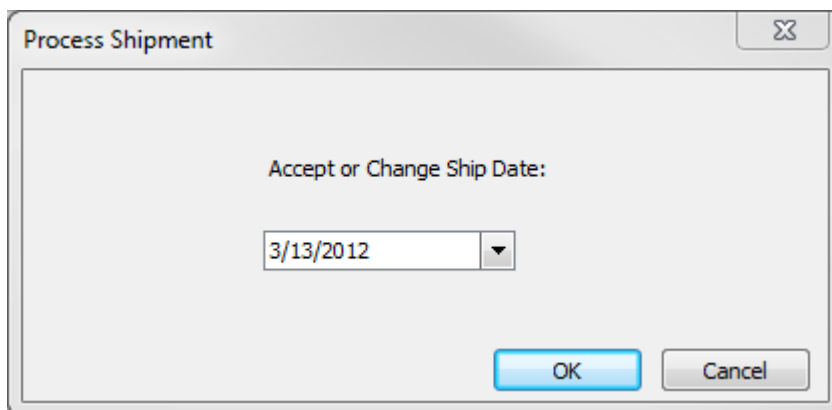

2. Select a queue from the Batch Filter dropdown
3. Documents in the selected queue will appear in the upper grid. You can further narrow the results displayed using the [Auto-Filter Row](#).
4. Select/highlight a document. Line items on the document will display in the lower grid

This screenshot is similar to the previous one but includes annotations. A red box highlights the 'Batch Filter' dropdown with the text 'Click in this window to view the lines'. A red arrow points to the selected document in the table. Another red box at the bottom highlights the detailed view of the selected document with the text 'Lines of that doc show here'. The detailed view shows items like 'MIC100 Microphone', '100NLG Green Phone', and '100NLG Green Phone'.

- To make changes to the document before processing, double-click the document to enter Edit Mode.
- With proper security, users can add, remove, or change line items (including quantity), add or modify Tracking Numbers, comments, and notes, and perform plugin actions, similarly to the steps for standard Sales Document Entry.

- Click **Save** to save any changes
- To forward the document to the next queue, click **Process**.
- The "Process Shipment" pop-up will appear, where you can change the actual Ship Date. Make a change if needed, and click **OK**

This will move the document through workflow based on the Doc Type and Doc ID.

**Note:** You can undo changes or simply exit Edit Mode by clicking **Cancel Edit**.

**Note:** You can also open the sales document on the Sales Document Entry screen by clicking the Doc # hyperlink

**Note:** Aside from the Cancel Edit button being greyed out, there will be no indication on the Shipping Review screen that the document has been successfully forwarded; however, if the process is unsuccessful, you will see an Active Support error message.

### Security

*Shipping Review\** - Enables the Shipping Review Module for the Security Group that is selected.

*Sales Document Tracking Numbers\** - Allows users to view the Tracking Numbers for a

document.

*Add Sales Document Comment\** - Allows users to add comments to a Sales Document

*Sales Document Notes\** - Allows users to add Internal Notes to a document.
