

Supported Credit Card Processors

Megan De Freitas - 2024-12-02 - Miscellaneous

Important Notice

After October 29, 2019, SalesPad will no longer be supporting CardControl.

Additionally, the application will cease to be a PA-DSS validated solution as of this date, and therefore CardControl customers would no longer be PCI compliant.

Instead, SalesPad Desktop now offers built-in credit card processing via [Nodus PayFabric](#). If you have questions or want more information on our credit card processing services, [please contact your sales rep.](#)

Overview

CardControl itself does not transfer money from a credit card account to the merchant's account. To accomplish this, CardControl depends on several third party services.

CardControl integrates with several credit card processors or gateways. This document will explain the level of integration and support CardControl has with the different processors or gateways.

3 Delta

3 Delta Systems is a leading provider of advanced payment and data security services in the card-not-present (CNP) Market.
