What is the cutoff date after which credit card processing will be an additional purchase?

Cavallo Support - 2024-12-02 - FAQ

After May 31, 2012, credit card processing will no longer be included in SalesPad Desktop as a built-in function. CardControl must be purchased if users wish to process credit card transactions with SalesPad Desktop.

Existing users of SalesPad Desktop (anyone purchasing SalesPad Desktop prior to May 31, 2012) who are current on Enhancement will have until May 1, 2013 to request a version of SalesPad Desktop that is compatible with CardControl. They will be given a license for CardControl and provided a minimum of one year of free Enhancement on CardControl. After one full year, the Enhancement price for CardControl will be added to the users' annual Enhancement invoice.
